## Nursery Department

We offer only the highest quality nursery stock obtainable. It is clean, healthy, and always gives satisfaction. Inspection invited.

When our busy season commences, we are rushed with orders, but there will be no unnecessary delay in shipping. We aim to ship orders the same day as received.

**GUARANTEE.** We warrant all trees and plants to be good and thrifty, but having no control over them after delivery to the transportation companies or over the planting and care after they are received by the buyer, we will not be responsible any further than stated. We exercise great care to have our nursery stock true to name. Nevertheless, should any stock prove otherwise, we shall not be liable for any sum greater than that paid us for only such stock as shall prove untrue.

**NURSERY INSPECTION.** Our nursery stock is inspected by Government inspectors, and our nursery is regularly inspected by county and state inspectors. Nevertheless, it is necessary by a state law that all shipments be inspected again when entering another county or state. If you have no local inspection service, the postmaster will forward the parcel to the nearest inspector. Ask your postmaster for particulars. If you have no inspector in your locality kindly mention this in your order so we may ship the parcel to the nearest inspector who will then forward it to you without delay.

All nursery stock shipped at purchaser's expense, except where marked postpaid. We deliver all nursery stock free in San Francisco. Items marked postpaid are delivered free within the Fourth Zone.

## To Our Friends and Customers:

**WE** take pleasure, with the advent of another planting season, in presenting this instructive booklet listing the hardy and tested varieties of plants suitable for this district, with proper instructions for their successful cultivation.

**VISITORS** are always welcome to inspect our store and nursery. It is situated in a garden district where there is plenty of parking space for cars. Having a seed-store and nursery combined, patrons will find it convenient to make all their garden-supply purchases at one time. Courteous and expert advisers are always on hand to help.

**THANK YOU.** We thank the many patrons who favored us with orders during the past season, and trust that everything we supplied came fully up to expectations.

**PLEASE ORDER EARLY.** The best time is just as soon as this catalog reaches you. The stock may not be ready by then, but your order will be given immediate attention, and be filled just as soon as the stock is available.

**TERMS.** Cash must invariably accompany order. Our prices are very low—as low as consistent with honest treatment and first-class stock—and we cannot, under any circumstances, open an account or do a credit business, regardless of how responsible a customer may be. Our liberal terms of prepayment and low prices will not admit it. All postpaid items are delivered free within the Fourth Zone. On all plant orders to be sent Parcel Post for less than \$1 add 15c to cover cost of packing and postage. Do not forget to add the State Sales Tax of 3% within the state of California.

**C. O. D. ORDERS.** We do not send goods "Collect on Delivery" outside of San Francisco.

**MAKING OUT AN ORDER.** Please write all orders plainly. Be sure to sign your name to the order, and give your post office address, county, and state, also express office address if different from that of the post office. Please keep a copy of your order to check up stock on arrival. Make remittance by Bank Draft, Post Office or Express Money Order, or Personal Check, payable to the Sunset Seed and Nursery Company.

**SUBSTITUTIONS.** As a rule, we do not substitute unless given permission to do so. Occasionally a variety may be sold out, and on small items it is generally better to make a good substitution than to send the order short. When ordering late in the season, it is always best to name a second choice—but it is always the customer's privilege to order "no substitutions." We rarely have to substitute except at the end of the season, but it is best to provide for the contingency. Our advice is to order early.

**SAFE ARRIVAL GUARANTEED.** We guarantee all stock to reach customers in good condition. Any just complaint should be made at once upon receipt of shipment. We ship to nearly every state in the Union, and with many years' experience in packing and shipping, we can safely agree to deliver stock to the most distant points in good condition. In case of unreasonable delay in arrival of stock, notify us, send copy of order, when originally mailed, how remitted, and amount.

**NON-WARRANTY.** Most of the failures with seeds, plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather, too deep and too shallow plantings, slugs, etc., therefore we give no warranty, expressed or implied, as to description, purity, productiveness, or any other matter of any seeds, plants, bulbs, etc., we send out, and will be in no way responsible for the crop.

# The Rose -- Queen of All Flowers

The Rose is our leading specialty because it is the most popular of flowers. This is as it should be, for it rightfully deserves the title of "Queen of Flowers". The Rose has been constantly improved in color, form, and blooming qualities. We have tried earnestly to keep abreast of these new creations and have helped to introduce many of the new popular Roses. We have also experimented extensively with rootstocks for budding, and now can safely say we have the best root obtainable to produce the finest Roses over the longest period. The success of your Rose garden is assured in placing your order with us. We are the largest dealers of high-grade budded Roses in San Francisco.

Remember that handling plants is our main business—not a sideline, as it is in department and hardware stores. Our Roses are handled as they should be with regard to the fact that they are alive and should be treated as living things. We do not dip them into boiling wax or expose them unnecessarily to heat and drought. **Our Roses will grow.**

**Plant Roses in November, December, January, February, March, and April.**

We carry a large stock of Roses in containers for planting throughout the year.

## The Grading of Roses

The public is led to believe in many cases that all two-year-old Roses are one grade. That is not so, for Roses are graded according to standards set by the American Nurserymen's Association. The difference between No. 1, 1½, 2, or 3 grades is such that unless one is familiar with comparative grades he is easily misled. Investigate where and what you are buying. Do not be misled by cheap prices for low grades. The best is never costly. We handle over 35,000 Rose bushes in our nursery. Come out and see this fine, healthy stock.

## Rose Culture

In deep, rich, heavy soil, even inclined to adobe, Roses are strong and vigorous, with flowers of great substance. But even in a light, sandy soil, Roses can be made to grow well, and they flower, as a rule, earlier than in heavy soil. To improve light soils, add clay, peat or adobe, and use our Special Sunset Fertilizer. See page 47. Do not apply strong fertilizers directly to the roots, but dust it on the surface and rake in slightly after the bushes are planted.

Should the roots appear to be dry on arrival, mix up some soil and water and "puddle" the roots in it for several hours before planting. In planting, thoroughly soak before adding the surface soil. This insures every portion of the root being thoroughly covered and prevents cracking of the surface. Frequent cultivating of the surface is absolutely necessary to keep this loose soil or "mulch", especially after watering. Plant each bush so that the point where it is budded is 2 to 3 inches below the ground. Do not sprinkle the tops of Rose bushes in the late afternoon as it causes mildew and other fungus trouble.

## Pruning

This should be done during December, January, and February. At that time the bushes are dormant. Cut just above a prominent but dormant bud that points outward. It is difficult to give full information about pruning, but it might be summed up as follows:

Remove all small, twiggy growth, cutting back to strong, well-ripened canes which are well furnished with healthy, big, dormant eyes. As a general thing, the entire top of the plant should be removed. See illustration above.

**Note:** Our Roses are used by the U. S. Government. We supplied hundreds of bushes to the Letterman General Hospital at the Presidio, Fort Mason, Navy Yard, Mare Island, and other posts. Our Roses have the quality required by rigid Government inspection. You will make no mistake in trusting us with your orders. Satisfaction guaranteed.

ALEZANE

## \*Alezane

U. S. Plant Patent No. 116. Large, reddish brown, urn-shaped bud; flowers cupped, opening to sorrel with golden yellow center, unfurling from sorrel to rich apricot with reverse of petals sorrel, striped with yellow veins. The flowers are affected very little by hot or wet weather. The plant is vigorous, growth is upright, and foliage a rich dark green. The variety is extremely interesting and striking. Good for cutting. \$1.50 each.

Please include Sales Tax within the State of California.

## \*Nigrette

H. T. Plant Patent No. 87. "The Black Rose of Sangerhausen." The cup-shaped flowers are intensely deep maroon with blackish velvet sheen and are deliciously fragrant. It is the darkest of Roses—appearing almost black from a little distance. The petals do not burn in the sun. The plant is continuously in bloom, spending most of its energy in forming blossoms. The sensation of the European rose world is now available for the first time in this country. \$2.00 each.

MARY HART

## \*Mary Hart

(The Red Talisman.) Plant Patent No. 8. Maroon-red buds and flowers which never turn blue. A superb cutting and garden variety. \$1.00 each.

## Two Outstanding Roses

### SUNKIST

The long, beautifully shaped buds and full, open flowers have a predominating color of glorious deep orange-yellow with varying tints of copper, buff, and bronzy pink. The flowers are sweetly fragrant and keep in splendid condition for three or four days after cutting, this long-keeping quality making this lovely rose a very desirable one for cut flowers.

**60c each**

These two exquisite roses are included in our Famous Six Collection. See page 10.

### MRS. SAM McGREDY

Distinct in color from anything as yet seen in roses, being a wonderful and beautiful combination of shades of scarlet, coppery-orange and heavily flushed on the outside of petals with rosy-red. The effect is rich and dazzling. Large flowers perfectly formed, very freely produced and fragrant. Vigorous in growth and one of the best all-purpose varieties.

**50c each**

Please include Sales Tax within the State of California

### California State Sales TAX

Please do not forget to add the 3% tax to your remittance.

*A Rose properly pruned and planted.*

\***Alezane.** H. T. \$1.50 each. See page 4.

\***Better Times.** H. T. Plant Patent No. 23. \$1.50 each. See page 45.

\***Countess Vandal.** Plant Patent No. 38. A hybrid tea with long, pointed bud and distinctive shadings of coppery bronze suffused with gold. The open flower furnishes an unusual arrangement of reflexed petals with a silvery sheen. A vigorous grower and a profuse bloomer, 25 to 30 buds and blooms on long stems at one time being not at all uncommon. One of the finest roses in many years. \$1.00 each.

\***Edith Krause.** H. T. Probably one of the most beautiful white Roses in existence. Very large white bud with a greenish tint, opening to a majestic, perfumed bloom of pure white. Long, strong stems for cutting. Unusually hardy. \$1.00 each.

\***Mary Hart.** H. T. \$1.00 each. See page 4.

\***Nigrette.** H. T. Plant Patent No. 87. \$2.00 each. See page 4.

\***Souvenir.** Plant Patent No. 25. "Yellow Talisman." A golden Talisman of great beauty with all the fine qualities of Talisman from which it is a sport. An exquisite bud opening to a full flower of a splendid golden yellow, suffused at times with a slight flush of pink. A large full flower, heavily petaled. \$1.00 each.

\***Token.** Plant Patent No. 95. \$1.50 each. See page 45.

## Novelty Climbers

### \*The New Climbing Rose BLAZE

**Everblooming Paul's Scarlet Climber.** U. S. Plant Patent No. 10. Blaze truly justifies its name. It is a marvelous, hardy, ever-blooming scarlet-red Rose combining the bloom and growth of Paul's Scarlet Climber with the ever-blooming character of Gruss an Teplitz. Blaze being a seedling of these varieties. A very vigorous grower and seldom out of bloom. In bloom the plants are covered with blossoms from top to bottom. It is truly a magnificent sight. The bush can be trained low for bedding purposes; medium for shrub use; or used as a climber. \$1.25 ea.

### \*Golden Climber

(Mrs. Arthur Curtiss James.) Plant Patent No. 28. The most interesting and unusual feature is that its extreme hardiness is combined with blooms of Hybrid Tea type and quality; long lasting and most always solitary on stems often 18 inches or longer. It is very hardy, being able to withstand sub-zero temperatures. The handsome glossy green wood and red thorns are very ornamental. \$1.50 each.

\***Climbing Etoile de Hollande.** H. T. Fragrant and thrifty, with beautiful blossoms, large and bold. The color is a glorious deep red. 50c each.

\***Climbing Queen Alexandra.** H. T. Probably one of the most popular Roses in the bush form. Now we have it in a vigorous climber. Outside of petals old gold, inside bright vermilion. 50c each.

\***Everblooming Climbing Rio Rita.** Plant Patent No. 117. The introducers claim this rose blooms constantly. It is a full flowered rose deep crimson in color and highly perfumed. Whole sprays of blossoms can be cut without injury to the bush due to its luxuriant growth. \$2.50 each.

See other Climbers, page 11.

Star (\*) indicates Patented Roses recently introduced.

Properly nourished rose bushes resist most fungus troubles. **Sunset Special Garden and Lawn Fertilizer** fills this need. (See page 47.) Your roses will respond to it quicker than any other plant food. It possesses the proper elements of nutrition essential to vigorous growth, luxuriant foliage and beautiful long-stemmed blossoms. It quickens blooming and furnishes a steady long-lasting supply of nourishing food. Use 3 to 4 tablespoonfuls to a bush. Water in well after applying. Never put it directly on the roots.

# Choice Hardy Everblooming Roses

Our Roses are strong, top-grade, selected two-year-old, field-grown bushes that will bloom profusely this spring.

Abbreviations: T., Tea; H. T., Hybrid Tea; H. P., Hybrid Perpetual; Poly., Polyantha (Baby Roses); Per., Pernetiana; N., Noisette.

## Plant Roses from November to April.

- Ambassador.** H. T. A Rose that has proved a great success in the past year. The beautiful bronzy salmon bud is borne singly on a strong stem and is similar to Talisman in form but uniform in color. Foliage dark and leathery. A profuse bloomer and intensely fragrant. 60c each.
- American Beauty.** H. P. Rosy crimson; extra large, full flowers; exceedingly sweet. Makes magnificent buds. 50c each.
- Angele Pernet.** H. T. Deep flaming orange, changing to brilliant tango. 50c each.
- Autumn.** H. T. A fully double flower of indescribable beauty, with exquisite colors of orange, red, and buff. Plant is a tremendous grower, and produces great quantities of fine, long-stemmed buds. Superb for cutting. 50c each.
- Betty Uprichard.** H. T. Inner face of petals is delicate salmon-pink but glowing carmine on the outside, with a suffusion of orange. 50c each.
- Briarcliff.** H. T. An improved Columbia. High-centered buds of exquisite form, and a bright clear shade of rose-pink. 50c each.
- Caledonia.** H. T. New. Bud long-pointed; flower large, extremely double, high-centered, very lasting, slightly fragrant, white, on long, strong stem. Foliage leathery. 50c each.
- Cecil.** H. T. Lovely, large, single flowers of buttercup-yellow, produced in clusters. It has very glossy, disease-resistant foliage, and blooms continuously. 50c each.
- Cecile Brunner.** Poly. Popular "Baby Rose." Very small, full, salmon-pink blooms with deep salmon centers, in clusters; delicately scented. 50c each.
- Charles P. Kilham.** H. T. The buds are long-pointed, of perfect shape, opening to high-centered, perfectly formed, full double flowers of a rich and brilliant oriental red, flushed with orange and glowing scarlet. 50c each.
- Columbia.** H. T. This beautiful Rose is perfect in form, a most pleasing shade of rose-pink, and delightfully fragrant. 50c each.
- Cuba.** H. T. Although the flowers are almost single, they possess a charm and brilliancy which is an entirely new tone in Roses—a bright vermilion-scarlet overlying an orange ground. A vigorous grower and good bloomer. 50c each.
- Daily Mail Rose.** See Mme. Edouard Herriot.
- Dame Edith Helen.** H. T. A new, glowing, fragrant pink Rose on erect, rigid stems. Free-flowering. 50c each.
- Dainty Bess.** H. T. Large, single flowers, 2½ to 3 inches across, with broad, fimbriated petals of pure, soft rose-pink. The large, flat clusters of stamens, held above vinous red filaments, provide a remarkable color effect. 50c each.
- Duchess of Atholl.** H. T. Large, globular buds and flowers of deep bronzy yellow, tinged with orange and old rose. The plant is very vigorous and bushy, and a profuse bloomer. 50c each.
- Edith Nellie Perkins.** H. T. New. Large, double flower with fine pointed center; inside petals salmon-pink; outside dark coppery red and orange. Fine grower and bloomer, with few thorns and splendid foliage. 50c each.
- Edith Krause.** See page 6. \$1.00 each.
- E. G. Hill.** H. T. The flower is scarlet, shading to a deeper pure red as it develops. It produces long stems naturally and the foliage develops freely and is of fine color. Does not fade even during the hottest weather, and does not mildew. Sweetly scented. 50c each.
- Etoile de Hollande.** H. T. This brilliant red Rose is very popular. Glorious, large blooms that hold their color in strong sunlight, never showing bluish tints; sweetly fragrant. Growth strong. Resistant to mildew. 50c each.
- Feu Joseph Looymans.** H. T. Remarkable for the length and beautiful form of its vivid apricot-colored buds and large, fairly full flowers of golden buff. Splendid foliage. Free-flowering. 50c each.
- Frau Karl Druschki (Snow Queen).** H. P. A remarkably vigorous grower. Its snowy-white flowers are very large, perfect in form, with large, shell-shaped petals. 50c each.
- General MacArthur.** H. T. This is probably the greatest favorite of all the garden Roses. The flowers are a vivid crimson-scarlet and retain their brilliancy when fully expanded. Very highly perfumed and practically free from mildew. 50c each.
- Golden Dawn.** H. T. Large, pointed buds of bright yellow, sometimes tinged with red. Flower large, well shaped, clear lemon-yellow. Clean, glossy foliage. One of the finest garden Roses. 50c each.
- Golden Emblem.** H. T. This is so perpetual flowering that as a garden Rose it is without a rival. The coloring is a cadmium-yellow, toning to sunflower-yellow. Altogether the most remarkable variety among modern Roses. 50c each.
- Golden Ophelia.** H. T. The flower is of medium size, perfect form, golden yellow in the center, paling slightly toward the outer petals. 50c each.
- Gruss an Coburg.** H. T. Very attractive, medium-sized flower of apricot-yellow. Vigorous, upright plant, with bronzy, disease-resistant foliage. Grows well in a shady location and is very fragrant. 50c each.
- Hadley.** H. T. Excellent, dark velvety crimson variety with long stems carrying the flowers well above the foliage. Very fragrant. 50c each.
- Hoosier Beauty.** H. T. One of the grandest red Roses, of an extremely rich velvety crimson color which does not shade into maroon. A heavy bloomer of strong, upright growth. 50c each.
- Independence Day.** H. T. Flame tints, over-lying a bright apricot color; blooms carried on erect stems. Exceedingly free flowering, with mildew-proof foliage. 50c each.
- Irish Elegance.** H. T. A single Rose, beautiful in bud; color apricot, shading to bronze at base of petals. 50c each.
- Irish Fireflame.** H. T. Beautiful single Rose, bearing its flowers in clusters of five or more; buds are a rich, deep orange, flushed with crimson. 50c each.
- Isobel.** H. T. Fine new single carmine-red Rose, flushed orange-scarlet; large petals. Very free-flowering. 50c each.
- Joanna Hill.** H. T. Long-pointed buds, opening to large, full, fragrant flowers of glorious clear sulphur-yellow, toned deeper in the center. Splendid for cutting. Vigorous, upright grower and continuous bloomer. 50c each.

## These Everblooming Roses

35c each; 3 for \$1.00; 12 for \$3.50, postpaid.

Two-year-old selected stock. Field grown.

The Roses offered on this page are not the top number one grade, but lighter stock than offered in our general Rose list. Yet these bushes are far superior to those sold in department stores, etc., as they are freshly dug and handled by experts. Besides they are never allowed to dry out and are not dipped in boiling wax. They will all grow and bloom profusely this spring.

## Gorgeous Rhododendrons

See next page for colored illustration and other collections.

The magnificent display of these splendid shrubs attracts thousands of visitors to Golden Gate Park during the blooming season. Rhododendrons are not tender plants as many people suppose. They do well most anywhere, if planted in a partially shaded location. Our named varieties are grafted or raised from cuttings (which are sometimes superior to grafts), well branched, and bear flower-buds with the exception of the smaller sizes, which will bloom next year. Do not confuse these varieties with wild types which do not grow out of their native habitat. Ready for planting about September 15 and through winter until May.

Buy them small and watch them grow. Special planting instructions are enclosed with each order.

## Hardy Flowering and Bedding Plants

Grown from the highest quality seed obtainable.

We grow most of the popular flowering and ornamental plants from seed in boxes for our spring trade. Any one can have a successful garden with the least amount of care at a saving of considerable time from these small plants, which are generally 4 to 6 inches high at time of sale—February to June. We carry certain flowering plants all year round. If interested, get in touch with us.

The bedding plants offered below are all in flats which do not always contain the same number of plants. We sell the flats as they come from the nursery. Some contain 100 and some less. The price on all flats is the same—\$1.50 per flat, except where otherwise stated.

If your order amounts to less than \$1.00, add 15c to cover cost of packing and mailing.

### Annuals

Some of our most popular cutting and bedding flowers are annuals. All are very free flowering and satisfactory. Be sure to order from this list if you want quick returns.

Unless noted, plants are furnished from  
February to June.

Plant orders of \$1 or over are postpaid.

## GIANT HYACINTHS Prize-Winning Imported Varieties

See colored illustration, page 24.

(Plant from September to January)

Hyacinths are very easy to grow out-of-doors, in pots or fancy jardinières with bulb fiber, or in Hyacinth glasses with water. For outdoor growing set the bulbs from 4 to 5 inches deep and 7 to 8 inches apart in loose soil or sand; give them extra depth to produce roots so that they will take food value from the soil.

For pot-growing, use sandy loam and bury the pots in the garden for five or six weeks or keep in a dark place to produce roots; then bring them into the house to force into blooming.

The Hyacinths we offer will all produce beautiful, full blooms that will be the pride of your garden.

**Bismarck.** Pale blue.

## GIANT DARWIN TULIPS

This favorite type excels in brilliancy of colors, perfect form of flowers, and long stout stems. As cut-flowers they are of great value, being good keepers. Our well-balanced list of varieties will help our customers to choose a collection of these bulbs which will give satisfaction. Tulips are very satisfactory, both for garden and pot culture. They require very little attention, and will grow in any fairly good soil. The soil should be forked deeply, then given a coating of Sunset Special Fertilizer. See page 47. Plant bulbs 4 to 5 inches deep, 5 to 6 inches apart, from September to January. These planting directions apply to all the different types.

# Highest Quality Flower Seeds

Space does not permit our listing all descriptions and varieties of the large assortment of seeds we carry. We can, however, supply practically any seed desired on request. We pack all our own seed and can assure our customers that they are absolutely fresh, as the tremendous demand for our seeds keeps our stock moving fast.

## How to Raise Flowers Successfully from Seed

It is better in most instances except hardy annuals, to start the seed in shallow boxes about 4 inches deep, using very sandy soil with leaf-mould, so that it will not bake, and provide for drainage by boring some holes in the bottom of the box. Set the boxes in a warm sheltered place, but protect from direct sunlight, as the seed is liable to be scorched. When the plants have made the fourth leaf, they should be pricked out, reset in another box or in pots, and when well started they should be transplanted into the garden. If the seed is to be sown directly in the garden, it should be done after the soil is well worked and fertilized. A slight depression should be made with a stick, the seed sown, and then covered with sharp sand about twice the depth of the diameter of the seed. The sand will prevent the crusting over of the soil after watering.

A common mistake in sowing flower seed as well as other seed is covering too deep. As a general rule, cover only to the depth of the thickness of the seeds. Always press the earth down firmly after sowing all flower seeds, else there is a danger of their drying up before the roots can get firm hold of the soil. Seeds of the hardier annuals may be sown where they are to grow.

The weeds should be kept down and the ground loosened often so that the plants will receive the full benefit of the rains and dews, which they will not do if the ground is allowed to become hard and baked. Water often.

It is very important to procure the best grade and quality of seed. One trial will prove to you we have the finest quality available.

We have classified the flowers as to annuals, perennials, etc., also the average heights and the months they can be planted in this section.

# Novelties - Specialties in Flower Seeds

ASTER CREGO WILT RESISTANT

## Aster Golden Sheaf

The deepest yellow Aster yet offered and the only one that is wilt resistant. The flowers are fully double with an attractive crest-like center. 2 feet high. Pkt., 25c.

## Giant Exhibition Begonias

### Tuberous Rooted Varieties

This is the finest seed obtainable and was carefully selected and gathered by the Begonia specialist in charge of our bulb-growing fields. Plants bloom the first season from seed, if sown in February or March in a temperature of 60 degrees. To secure the best results for outdoor planting, they should be set out as soon as the ground becomes warm. They are covered the whole summer with bright and elegant flowers. See colored illustration, back cover. All varieties, mixed. Pkt., 50c.

### BULB CULTURE

For bulbs see page 48. They require rich soil and plenty of moisture for best results. Above all, see that they have good drainage. Use one-third each of sand, peat and loam. Mix well and plant the bulbs about one-half inch deep. For outdoor culture place the bulbs about 15 inches apart each way. They should be planted in part shady or shady locations, and do very well outdoors. They can also be grown as pot-plants indoors. One bulb in a 6 or 7-inch pot is the general practice. Several bulbs can be planted in larger pots. Remember the north side of a building, a north wall, or other shady spot is just the place for these beautiful plants.

## Cosmos

### Early Klondyke "Orange Flare"

Klondyke Cosmos is not a new variety. But "Orange Flare", a vivid orange, will bloom in less than four months. This is unprecedented in the flower world. Stems long and wiry. Splendid for cutting. Pkt., 20c.

Novelties add beauty and interest to your garden. May we suggest that you select as many as possible, as this list is up-to-date and some of these Flower Seeds have never been offered before. Cultural directions are printed on the backs of our Flower and Vegetable Seed packets. Follow carefully our instructions for planting Flower Seeds, on page 33 of this catalog. Also note how we have classified the different flowers as to annuals, perennials, borders, heights, etc., and the proper time for planting.

All prices on Flower Seeds are postpaid.

## Asters

### Crego Wilt Resistant

This fine variety grows over 2 feet tall and is well branched; of free sturdy growth. The fluffy, graceful flowers are rarely less than 4 inches across and frequently over 5 inches. Fine for cutting. White, Rose, Shell Pink, Crimson, Light Blue, Royal Purple. Any of the above. Per pkt., 10c; 1/8 oz., 50c.

Collection of one packet each of the above 6 colors, 50c.

Mixture of all colors. Pkt. 10c; 1/8 oz. 50c.

## Asters

### Improved New Giant California Sunshine.

This wonderful Aster is a decided improvement over the old California Sunshine. The clear and beautiful colors are varying shades of pink, rose, blue, and lavender.

A dual-tone effect is obtained through contrasting light yellow and blue centers. The outer or guard petals are somewhat loosely placed, creating an airy, lace-like effect which is altogether charming. The flowers measure 4 to 5 inches across and are borne on heavy stems fully 18 to 20 inches long. Mixed colors. Pkt., 15c; 1/8 oz., 50c.

## Pompon Asters

A pretty little Aster bearing a great profusion of dainty, button-like flowers with quilled petals. 12 to 15 inches. Rose, White, Red, Blue or Mixed colors. Pkt. 15c; 1/8 oz., 40c.

## Annual Canterbury Bells

A new strain of these beautiful flowers which will commence blooming in August from seed sown in February. The plants grow 2 to 2 1/2 feet tall, each plant having from 6 to 8 spikes of bloom in shades of dark blue, light blue, pink, rose and white.

Angelus Bell. A beautiful deep rose. Pkt., 20c.

Liberty Bell. Intense violet-blue. Pkt., 20c.

Select Mixture. Pkt., 15c; 1/8 oz., 60c.

## New Cinerarias

### California Super Giants

These wonderful new Cinerarias are of compact growth 15 to 18 inches high. The blooms are carried on immense rounded trusses above the clean dark foliage. The huge blossoms measure from 4 to 6 inches across with petals 1 to 1 1/2 inches wide. The color range is magnificent, from exquisite pastel salmons, azure blue, snowy white to the deepest blood red and violet blues. We can supply the following colors: Blue Shades, Crimson and Carmine Shades, Salmon Shades, and Superb Mixture of all colors. Any of the above, 50c per pkt.; large pkt., \$1.00 each.

## New Calendulas

**Orange Shaggy.** An artistic, new, large, orange calenda-  
dula that is a new "break". Petals deeply fringed  
and laciniated, giving the flower a most informal  
air. As outstanding and useful as "Sunshine" but  
in a different color. Pkt., 25c.

**Sunshine** (Chrysanthemum Flowered). Large double,  
buttercup-yellow flowers on exceptionally long, stout  
stems. The petals are long, wide and drooping, giv-  
ing the flowers a globular appearance. Pkt., 15c.;  
¼ oz., 35c; ½ oz., 60c; oz., \$1.00.

## Giant Imperial Larkspurs

A greatly improved strain of the Tall Branching  
Stock-flowered Larkspurs, of upright habit and branch-  
ing from the base.

**Blue Bell.** Beautiful, clear light blue.

**Blue Spire.** Intense deep blue.

**Carmine King.** Deep carmine-rose.

**Daintiness.** A delicate lavender.

## Marigold

**Yellow Supreme.** The flowers are very large, and their  
light golden-yellow petals fairly glow and sparkle in  
the sunshine. You will appreciate the pleasing fra-  
grance of the blossoms, too. The tall plants make a  
striking appearance in a border by themselves. Or,  
try some of them in combination with Guinea Gold  
and see how effective they are. Pkt., 20c.

**Royal Scot.** A wonderful new tall French Marigold  
growing 24 to 30 inches in height. The color is a  
combination of mahogany and gold in symmetrical  
stripes radiating from the center of the blossoms.  
Pkt., 15c.

## Early Giant Imperial Stocks

An especially fine strain of Stocks, growing from  
2 to 2½ feet tall, and of branching habit. They are  
very free blooming and produce a high percentage of  
double flowers. Splendid for cutting and bedding.

## Our Giant Orchid-Flowering Spencer Sweet Peas

Plant September to June

### How to Grow Sweet Peas Successfully

Prepare the soil with a liberal dressing of our specially prepared Sunset Fertilizer. See page 47. Sweet Peas are heavy feeders. The soil should be deeply dug and thoroughly mixed with the Fertilizer. Make a trench about 5 to 6 inches deep, planting the seeds 3 to 4 inches apart and covering them 1 inch deep with good soil. After planting, tread the soil lightly over the seeds or firm it with any suitable implement. Thoroughly soak the bed, and remember to keep it always moist, as any dryness after seeds germinate is fatal.

When the plants are 6 inches high, pinch out an inch or so of the top to make them husky and sturdy. Gradually fill in the trench to insure deep-rooted, drought-resistant plants that will bear magnificent, large, long-stemmed flowers. Five-foot common chicken wire, neatly stretched, is an ideal trellis but strings or small boughs can be used.

## Choice Grafted Lilacs

New Improved Varieties

Plant November to April

Beautiful spring-flowering shrubs with very fragrant flowers in large clusters. Immediately after blooming they should be pruned, as the flowers are always on the old wood. Grafted varieties will usually bloom the first year.

### DOUBLE VARIETIES

**Condorcet.** Almost pure blue. Best double of its color.

**Jeanne d'Arc.** Easily the best double white.

**Katherine Havemeyer.** Buds mauve opening lilac-blue. Flowers large. Clusters on long stems.

**Marechal Lannes.** Pinkish mauve. Individual flowers exceptionally large. Semi-double.

**Mrs. Edward Harding.** Rosy carmine. Took a special prize as best "red" lilac. A fine variety.

**Pres. Fallieres.** Lavender. Its enormous compound clusters are largest of all.

### SINGLE VARIETIES

**Jan Van Tol.** Snow white. Probably the best single white.

**Lamartine.** Mauve-pink. Very large compound clusters.

**Mirabeau.** Mauve opening bluish. Earliest of all.

**Volcan.** Buds deepest imaginable purple. Flowers dark purple. Was a sensation at Oakland Spring Garden Show.

Any of the above Lilacs; 2½ to 3½ feet, \$1.00 each; 5 for \$4.50, postpaid. The entire collection of 10 for \$8.50.

# High - Quality Lawn Seeds

WE SPECIALIZE  
IN HIGH-GRADE  
LAWN SEED

Our Lawn Seeds are the finest and highest grade obtainable. We supply large quantities of our seed to the Government Posts in and around San Francisco and also to the Navy Department.

## How to Produce a Good Lawn

Lawns can be made in California any month of the year, but if made from September to May will require less care and water. The ground should be well prepared and the soil should not be too rich, as it is not desirable to have a rapid growth when starting a lawn.

After the ground is thoroughly worked, roll it before seeding, to prevent it from settling unevenly, and then rake the surface lightly. Sow the seed so as to cover the ground thoroughly, and then cover it lightly with soil. Roll again so as to press the seed in firmly. If you have no roller, use boards and tramp on them so as to pack the ground firmly, but a roller is preferred.

Grass seed will germinate in from 8 to 15 days, according to the weather. If a lawn is made during the summer, the ground should be covered lightly with peat after the seed has been rolled, so as to retain the moisture. New lawns should not be allowed to dry out,

not even for a half day. For the first 15 days the lawn should be watered twice a day if necessary.

A lawn should be fertilized after the first cutting, and at least twice a year. Water well after applying. We recommend Sunset Special Lawn and Garden Fertilizer. See page 47.

Sow the seed thick enough at the start and save yourself a lot of unnecessary work. Use 1 pound to a space 10x10 feet.

**WARNING.** Do not use the so-called rotted manure which is being sold to inexperienced gardeners. It is full of wild clover and other weed seeds. Pests, such as slugs, snails, beetles, etc., get a start in most gardens through eggs and larvae in such manure. It is expensive when you take into consideration that a few pounds of good fertilizer is equal to a sack of manure. If you want a moisture-holding material for top-dressing use peat; it is clean.

All prices on Lawn Seed are postpaid within the Fourth Zone.

Lawn Seed prices are subject to change without notice.

**Australian Rye Grass.** A vigorous, quick-growing Lawn Grass, but a little coarse. Very satisfactory for lawns in San Francisco. Best grass for sandy soils. Lb. 30c; 10 lbs. \$2.50.

**Pacific Rye Grass (Genuine Pacey's Rye Grass).** This Grass is similar to the Australian Rye Grass but has a finer leaf and is longer lived. Lb. 35c; 10 lbs. \$3.00.

**Chewing's Fescue.** Forms a close, lasting turf, succeeding well under poor conditions. It is used extensively in lawn and putting-green mixtures. Lb. \$1.10; 10 lbs. \$10.00.

**Creeping Bent (Genuine Seaside).** Being of fine texture, this Grass is excellent for lawns and putting greens, as it makes a low, velvety growth. Lb. \$2.00; 10 lbs. \$17.50.

**Kentucky Blue Grass.** Fancy; extra clean. The most popular Grass for lawns. It is dark green and of

dense growing habit, making a beautiful turf in a heavy or black soil. Lb. 50c; 10 lbs. \$4.50.

**Red-Top Grass.** Gives a quick effect and succeeds on all soils, though doing best on moist soils. Should be in all lawn mixtures. Lb. 45c; 10 lbs. \$4.00.

**White Clover.** Of dwarf habit, with creeping stems, rooting at joints, thus making an excellent turf that stands constant tramping. Used for lawn-planting, either alone or in mixture with Grass Seed. Lb. 70c; 10 lbs. \$6.50.

**Park Lawn Mixture.** (Formerly known as Golden Gate.) This mixture of hardy Grasses contains a little white clover and forms a thick strong turf that will stand hard usage. Lb. 50c; 10 lbs. \$4.50.

**Shady Nook Mixture.** Contains Grasses for making good lawns in shady places and under trees. Lb. 70c; 10 lbs. \$6.50.

### SUNSET SPECIAL LAWN MIXTURE

This Mixture will produce the finest lawn in almost any location. It is composed of five grasses and white clover, and is the result of many years' experience. It will produce that beautiful velvety green lawn that everyone admires. One pound will sow a space 10x10 feet. Lb. 60c; 5 lbs. \$2.75; 10 lbs. \$5.00.

## Our Floral Department

In addition to our seed and nursery business, we carry a complete line of cut flowers at reasonable prices and deliver them free anywhere in San Francisco. A skilled floral artist is always ready to make up artistic funeral pieces, baskets, wedding bouquets, etc., on short notice.
